VANNPAX

WORLD-STANDARD PACKAGING MACHINE SOLUTIONS

Our experienced international team has industry knowledge in the maintenance of packaging machines in the food, beverage, pharmaceutical and cosmetic industries.

Vannpax was formed due to a perceived shortage of skilled artisans in factories and production plants.

Our skilled team also develops and sells world-standard packaging machines.

With Vannpax servicing established blue chip customers, our company partnered with IPA Global which is part of the DFT Group in 2019. With a strong financial investor and long-term strategic partner in a constant tough and changing economic environment, Vannpax continues to service it's customers internationally.

Vannpax has a tailor-made solution for you.
