WHO IS VANNPAX?

BACKGROUND

VANNPAX is based in Paarl, Western Cape, and provides custom-made support to the PACKAGING MACHINE INDUSTRY in Southern Africa and worldwide. Our company has been in operation since October 2013. Over the past 27 years, the management team has combined knowledge of the food, beverage, pharmaceutical, and cosmetic industries in the field of packaging machinery and maintenance. An apparent shortage of skilled artisans led to the creation of VANNPAX.

VANNPAX services established blue-chip customers, so our company has partnered with IPA Global, which is part of the DFT Group. While operating in a constantly changing and tough economic environment, VANNPAX remains committed to their global customers..

OUR APPROACH

VANNPAX evolves continuously, and our team of in-house engineers responds quickly to any issues. We design and manufacture custom packaging systems and machines with high quality manufacturing standards.

The current model range of uniquely designed models includes model 1002 manual loading cartoner with automatic closing, model 1003 self-locking tray erector, model 1007 case packer and model 1009 automatic display cartoner.

Providing our customers with cost-saving measures and increased productivity is part of our engineering team's role. The goal is simple but effective: *anywhere there is a challenge, there is a solution.*

1002 Manual Cartoner™
